

Report:

I would like to thank the COE internship program for giving us the opportunity to visit and study abroad in New South University and University of Sydney-Australia. Indeed, the visit was very instructive not only from scientific point of view which helped us to advance our research and learn how to work within other group of research, but also from cultural point of view.

I am sure that this kind of international short visiting will help the entire young student to develop a self confidence and be ready for a future challenge in research area.

Paper:

I would like to inform you that the work that has been done in Sidney University was accepted to be presented in the 29th Annual Conference of the Solar Energy Society of Canada, which will be held at University of Waterloo-Ontario-Canada in August 21st-25th, 2004.

The paper entitled: *“A new simple approach for calculating the optical constants of clear glass window from 0.19 to 5 microns”*.

Authors: M. Khoukhi^{*}, S. Maruyama^{*}, S. Bosi^{**}, A. Komiya^{*} and M. Behnia^{***}

^{*} IFS, Tohoku University, Japan

^{**} Department of Physics, University of Sydney, NSW 2006, Australia

^{***} Dean of Graduate Studies of University of Sydney, NSW 2006, Australia

The paper will be presented By: M. Khoukhi.

A copy of a paper will be sent to your office upon receiving the proceedings.

Thank you very much and I still at your disposal should you need any further details.

Khoukhi Maatouk
PhD candidate, 3rd grade
